

## LAB 1

### Problem 1

| No | User Action                                | System Response                                                              |
|----|--------------------------------------------|------------------------------------------------------------------------------|
| 1  | User types in PIN into main screen         | System checks validity of PIN and presents options to user on another screen |
| 2  | User selects “Withdraw”                    | System displays another screen for entering an amount                        |
| 3  | User input withdraw amount into the screen | System checks balance and dispense it.                                       |
